Sec. B.005 ELECTRIC SERVICE RATES & FEES				
1	Power Cost Adjustment (applies to Schedules 140, 141, 142, 143, 144, 145, and 146)		The power cost adjustment will be calculated based upon the total kWh included in the monthly bill times the adjustment per kWh for the current month, calculated in accordance with section 13.07.033 of Caldwell's Code of Ordinances.	
Applies to Schedules 142-143	Minimum bill will be the highest of:	The sum of customer charge and demand charge under the above rate plus applicable power cost adjustment on the kilowatt hours used. OR		The minimum monthly charge specified in the customer's service contract with the city, plus applicable power cost adjustment on the kilowatt hours used.
	Determination of billing load:	The billing demand will be the highest 15 minute kW load during the billing period. Only connected loads in excess of 15 kW by kWh consumptions will be measured.		
Applies to Schedules 144	Billing Demand	The billing demand shall be the maximum 15 minutes measured kilowatt demand in the billing period, but not less than 60% of the peak demand measured in the twelve month period ending with the current month. Unless otherwise specified in a firm electric service contract agreement, if at any time a customer billed under this schedule continues for a period of twelve consecutive months without a demand in excess of 500 kW, Schedule 144 (Large Light and Power Electrical Service) shall apply beginning with the first of the month succeeding such twelve month period.		
	Power Factor	Should the power factor be lower than 0.90 lagging, the city may adjust the measured demand by multiplying by the ratio of 0.90 to the actual power factor.		
	Primary Service	Where service is taken by the customer at the city's available primary voltage and where the customer owns, operates, and maintains all service facilities, except metering equipment. Required to take service at such voltage, a credit of 2% of the base rate charges will be allowed. Metering may be primary or secondary (corrected for the transformer losses) at the city's option.

Square Foot Construction Costs		
	Group (2018 International Building Code)	B Business
	IA	200.26
	IB	192.96
	IIA	186.54
	IIB	177.38
	IIIA	161.90
	IIIB	155.84
	IV	170.4
	VA	142.43
	VB	136.08
The Square Foot Construction Cost does not include the price of the land on which the building is built. The Square Foot Construction Cost takes into account everything from foundation work to the roof structure and coverings but does not include the price of the land. The cost of the land does not affect the cost of related code enforcement activities and is not included in the Square Foot Construction Cost. New Building Group B occupancy Type VB construction 10,000 square feet total building area Declared construction valuation \$1,200,000. Calculated construction valuation - 10,000 square feet X \$136.08 per square foot = \$1,360,800. The calculated construction valuation is greater than the declared construction valuation so \$1,360,800 is used to calculate the Bureau Veritas fee for the project. * Note: BVNA fees do not include any taxes, licensing or other fees imposed by governmental or outside agencies.
